

Verdict Overview

Review month 2026-06 · trailing-12-month basis · headline unit: SKU × channel

NET SALES · TTM €34.7m	CM3 · LAST 6M 14.9%	VS AP26 PLAN -6.1pp	SKU × CHANNEL 506	NEED ACTION 235
---------------------------	------------------------	------------------------	----------------------	--------------------

VERDICT	CRITERIA	ACTION	SKUS	REVENUE TTM	CM3 (6M)
Scale	At/above CM3 target and growing ≥10% or top-volume tier	Invest — budget, stock, variations, new markets	33	€5.02m 14%	€666k 26%
Defend	At/around target, no trigger fired — hold & protect (incl. the healthy middle)	Hold — availability, price, listing quality	121	€12.75m 37%	€1,327k 52%
Fix	CM3 >5pp below target or negative but worth saving (volume/improving); or supply-stalled	Repair — price, fees, COGS, ad efficiency, restock	83	€12.80m 37%	€531k 21%
Harvest	Profitable but below target, bottom-volume, flat/declining	Milk — cut ads to maintenance, no restock	13	€0.39m 1%	€23k 1%
Exit	CM3 negative ≥3 of 6 months & not improving, or whole product under €15k/yr run-rate	Discontinue / delist in this market	152	€0.98m 3%	€27k 1%
No data	Fewer than 3 months of sales, or no margin feed (a state, not a verdict)	Close the data gap	104	€2.73m 8%	€2k 0%

Reading it: **Fix** is the margin problem — ~37% of revenue earning only ~21% of CM3. **Defend** is the profit core — 24% of SKUs, ~52% of CM3. **Exit** is now aggressive (whole products under €15k/yr are discontinued) but touches only ~3% of revenue.

New 44 launches inside the 6-month incubation window are shielded from Fix/Exit. Rules & thresholds live in `config/rules.yaml`.
